

July 2020

Blessings!

This crazy time has been a total process of adjustment in several ways, in our city the lockdown is really heavy, even until today it is really restricted, only we can go out to get groceries or any thing one time in a week according with the last number of your ID card, dont allow to have meetings, and develop all the activities related with the church and ministry online, and believe it or not now we are more busy that before.

We really appreciate your support in pray for our city, in this moment is the second city in the country with major number of cases and the first in deaths, several people that we know (relatives, pastors, church members, neighbors) have the Covid, including my brother, so our pray is God taking control of this situation, heal the people that already has the virus and protect our families.

Second for the economy of the people, because of this situation the economy of a lot of people came down, we are trying to help mostly of the people that we can, many business are closed, so our pray is for provision of God for all the people.

Other is for our ministry e3Colombia, we are close to launch our "online" training using google tools, praying for engage the pastors and leaders.

One good thing is the people is looking for God more and more, our pray is that the churches can be able to see the opportunities and development media tools to reach and follow the people.

In personal way we appreciate your prayers for our protection during this time to my wife and my daughters, also the provision in this time.

Bernardo Gonzalez
