Intentional Church Planting in the North Coast

While going through the Mentor Network, many pastors from the "Church of God of the Prophecy" denomination caught the vision for establishing new churches. They prayerfully identified an area in the city of Malambo to plant a church. On July 3rd, they shared the gospel door to door with people who lived within five blocks (walking distance) of the new church. That day, the team of 14 pastors and leaders shared the gospel with over 90 people! Everyone was invited to "Yo Soy Segundo" small groups later that evening. Since then, the leaders are continuing to follow up and disciple new believers.

Because of the success the "Church of the God of the Prophecy" saw while planting a church in Malambo, e3 Colombia enhanced the Mentor Network curriculum to include a period of "in-field equipping". While going through the Mentor Network, mentors and mentees will use the same process as the "Church of God of the Prophecy" used to establish a new church. By the end of the Mentor Network process, pastors and leaders will have already established a new church! This new enhancement of the Mentor Network is currently thriving in the North Coast, and in the coming months it will be implemented in other regions.

FROM THE DIRECTOR.

In recent months we have worked to improve the Mentor Network process to be even more focused on intentional church planting. We restructured the Mentor Network curriculum into two parts. The first

part gives specific tools to put into practice immediately and establish a new church. The second part gives specific tools to follow up and help their church become healthy. Please pray for this new process as we implement it throughout the country. God bless you!
